# **SO WONDERFUL** AND EASY PARAGLIDING CAN BE

TE

EN

# WHO IT'S FOR:

Beginners who are looking for a fun, but performant and fast glider, that-neverthelessstill is gentle and easy to fly, will find a good companion in the new Cyber TE.

# THE **CHARACTERISTICS**

The Cyber TE has improved launching abilities due to its mix of materials. It launches without much effort in no wind. The glider now goes smoother in active air and surges towards the thermals, making the first thermals easy and fun.

LINE GEOMETRY

NUMBER OF CELLS

We also increased the top speed to make soaring at a coast or jumping the valleys much more easy and fun. Without giving up durability, we managed to make the glider lighter, the canopy smoother and the packing size smaller.

The handling is balanced to be both playful but also precise, giving you a safe feeling on your first thermal and cross-country flights.
